Introduction

TornadoSwap

What is TornadoSwap ?

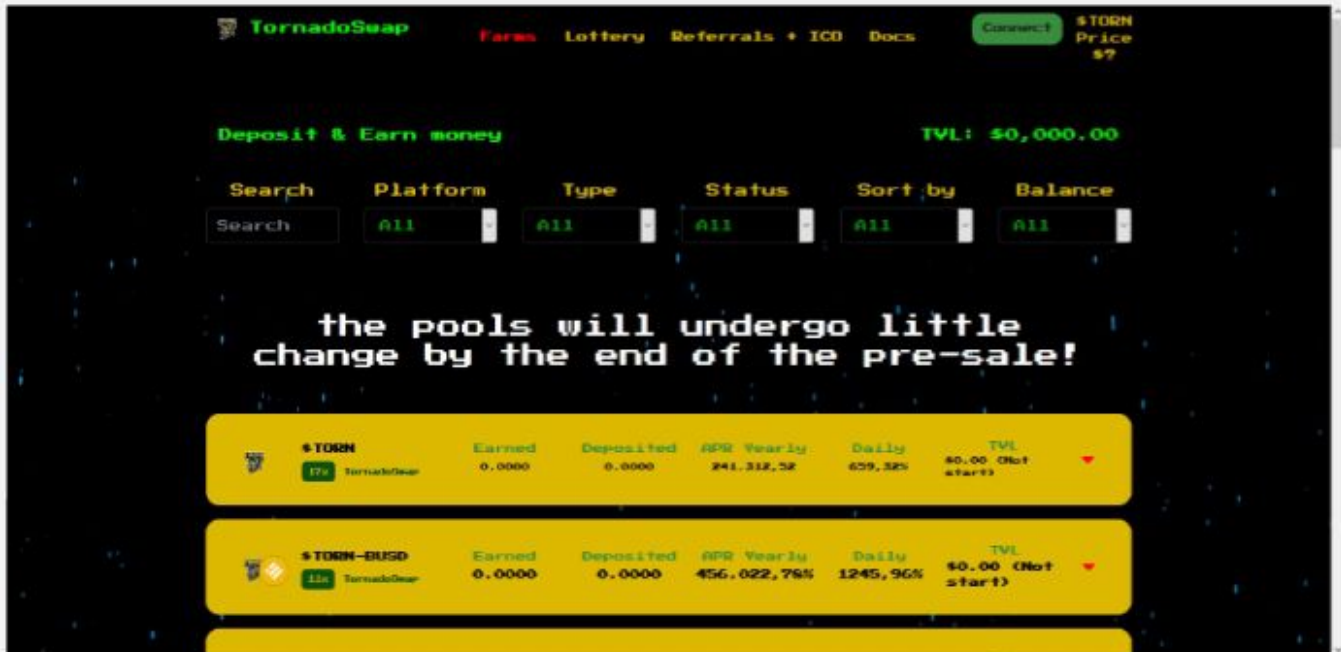

TornadoSwap is a brand new DeFi project designed by an experienced development team as the 3rd generation deflationary yield farm & AMM on #BSC.

Besides the buyback burning mechanism introduced by Goose Finance, we have implemented some unique innovative features on TornadoSwap's yield farm to fight against the inflation problem faced by most traditional yield farms and even Goose Finance.

Unlike other deflationary yield farms, we don't plan to develop layered farming after launch. Because we think it doesn't make much sense to keep issuing new tokens by layered farming. Kindly remind, please always Do Your Own Research! Only Invest what you can afford to lose.

App : <https://app.tornadoswap.online>

Desktop APP :

Mobile APP :

- Available for :
Metamask,
WalletConnect, BSC
Wallet, TrustWallet.
- 3 Farms for \$TORN
- Open source
development.
- Very high APR.

TornadoSwap.online - from May 10 to May 25

ROADMAP

10
May

creation of the idea and start of programming

11
May14
May

Full team, development of the implementation of our yield farm

16
May

Stay clear with you by clearly displaying all the source code on github, choosing an OPEN SOURCE project

22
May

Sponsorship launch a day before the ICO, AIRDROP OPENED! we want earlys to be the most rewarded. Free \$ TORN system, no whitelist for the ico

19pm
UTC -
23 May

Launch of the ICO, more info on our website. Recovery of your ICO tokens - 5 hours before the fair launch

19pm
UTC -
24 May

Fair launch on Pancakeswap, lots of ads, tokens burns. 24 hours to upgrade the token

19pm
UTC -
25 May

Opening of farming on our site, (the opening block remains to be defined), Opening of the lottery

<https://tornadoswap.online/><https://t.me/tornadoswap><https://github.com/tornadoswap>**TornadoSwap***We will continue with additions and development if our development fund allows us to continue.*

Why does \$TORN have infinite inflation?

\$TORN no longer has infinite inflation - Hard cap of 1000 tokens.

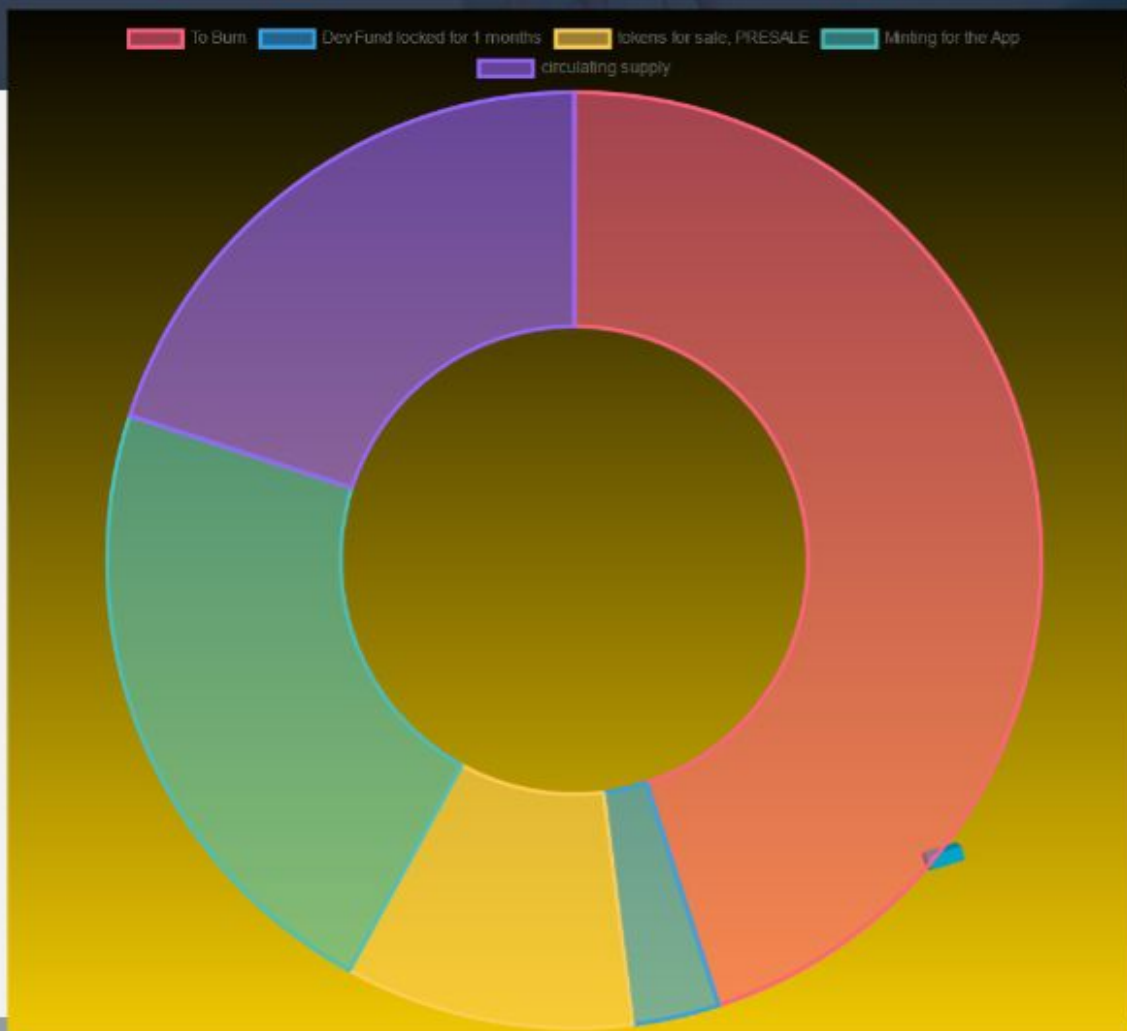

What is the cap of the \$TORN token?

A hard cap of 1000 has been approved - but there are not yet contractual changes in place to create this hard cap.

Yes of course. 35% of the supply is intended to be burned !

How does \$TORN enter into circulation?

New TornadoSwap is created at 0.1 Tornado per block for tokens that are staked in the farms.

Every time someone trade \$TORN, a 5% tax applies and is used as followed

Fees : 5% each transactions !

- 2% for the dev Wallet.
- 1% is burned.
- 2% Auto LP.

\$TORN token: `0xe2eb7f2baf1ab2dc4c1b140faa2f75f3a4f8d208`
